

#### Product Overview:

Designed specifically for the Auri™ assistive listening systems, the Auri™ Neck Loop delivers exceptional clarity for individuals using telecoil-equipped hearing aids and cochlear implants. Built to support modern Auracast™ broadcast audio, the Auri™ Neck Loop automatically adapts when connected to an Auri™ RX-1 Receiver, enabling users to seamlessly switch between telecoil mode and earphone mode based on their accessory choice. A built-in 3.5 mm output allows connection to standard earbuds or headphones for users without telecoil-equipped devices.

Whether in theaters, classrooms, houses of worship, conference rooms, or corporate spaces, it empowers venues to offer inclusive, high-quality audio and fully meet accessibility expectations. Optimized for use with Auri™, the Auri™ Neck Loop ensures every listener, regardless of hearing ability, can enjoy clear, effortless sound anywhere Auracast™ is available.

#### Highlights:

For seamless audio accessibility for telecoil hearing aids and cochlear implants, the LA-470 Auri™ Neck Loop bridges that gap for use in theaters, classrooms, houses of worship, conference rooms, or corporate spaces.
