This equipment has been manufactured using the highest quality components and techniques. In the unlikely event it should need service, see warranty information and procedures below. For questions call Customer Service 9:00 AM to 5:00 PM EST Mon. - Fri.: (207) 637-3668

WARRANTY:
Lightning Enterprises warrants this Desiccator Option product to be free from defects in workmanship and material under normal use and conditions for a period of 90 days. Should service be required by reason of any defect or malfunction during the warranty period, Lightning Enterprises will repair, or at its discretion, replace this product, with proof of purchase, without charge (except for a $5.00 charge for shipping and handling).

When returning this product use the following procedure:
1) Pack the unit in a well padded, heavy corrugated box intended for shipping.
2) Enclose a photocopy of your receipt, credit card statement, or other proof of date of purchase.
3a) WARRANTY REPAIRS: Enclose a check for $15.00 for return shipping payable to Lightning Enterprises.
3b) OUT OF WARRANTY REPAIRS: Enclose a check for $15.00 for return shipping and handling payable to Lightning Enterprises. A written estimate will be provided for repair approval.
4) Send the unit to:
   Lightning Enterprises
   18 Haflan Drive
   Limington, ME 04049

Please Note: This warranty is only valid in the USA. Any applicable implied warranties are also limited to 90 days and Lightning Enterprises will not be liable for consequential damages. Some states do not allow limitations on implied warranties or exclusions of consequential damages, so these restrictions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
The Vacuum Desiccator Option is an additional accessory for the vacuum pump units that uses a slip-luer fitting and is designed for dehumidifying hearing instruments. It works on a vacuum principle of drawing out all air within the chamber, including any moisture within the hearing aid which may cause intermittent problems. The desiccator chamber is a laboratory quality unit, and is capable of holding vacuum pressure up to 28” Hg.

READ ALL CAUTIONS AND WARNINGS IN THE OPERATION MANUAL SUPPLIED WITH YOUR VACUUM UNIT BEFORE USING THIS PRODUCT

**Parts List:**

<table>
<thead>
<tr>
<th>Part Description</th>
<th>Part Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Desiccator Chamber Base</td>
<td>DP-1</td>
</tr>
<tr>
<td>Desiccator Dome with grommet</td>
<td>3865-GR</td>
</tr>
<tr>
<td>O-Ring</td>
<td>9452K191-1</td>
</tr>
</tbody>
</table>

**Desiccator Operation:**

1) Ensure the vacuum pump is turned off.
2) Remove any cleaning needles attached to the Slip-Luer Filter assembly on the vacuum pump. Insert the Slip-Luer into the Desiccator Grommet until snug as shown in Figure 1. Do not insert beyond the tapered end of the fitting.
3) Insert hearing aid to be dried into desiccator chamber and seat the chamber dome onto the desiccator O-Ring.
4) Turn the vacuum pump ON for approximately 2 minutes.
5) Turn pump OFF and remove the Slip-Luer from the Desiccator Grommet.
6) Remove hearing aid and test. Repeat if necessary.

**TIP:** You only need to insert the slip-luer fitting into the desiccator grommet until it is snug as the vacuum will make the seal. Inserting the slip-luer further than necessary will make it more difficult to remove.
